Name: _____ Signature: _____ Date: _____

1. Maidstone Borough Council takes its obligations under the Data Protection Legislation very seriously and will not disclose information to any unauthorised person. Information may be shared with other services within the Council or disclosed to other Local and Public Authorities or Government agencies that have a legitimate reason to request the disclosure. The Council is under a duty to protect the public funds that it administers and to this end, it may use the information that you have provided for the prevention and detection of crime and / or fraud. It may also share this information with other bodies responsible for auditing or administering public funds for these purposes. If you wish to know more about the uses to which the information may be put by the Council, please contact the Assistant Director of Environmental and regulatory Services.
2. The applicant is the person on whose behalf the work is being carried out, e.g. the owner of the building. Only one copy of this form is required.
3. Where the proposed work includes the erection of a new building or extension this notice should be accompanied by a block plan to a scale of not less than 1:1250 showing the size and position of the building, the boundaries and the drainage.
4. Where work is to commercial premises a Full Plans application must be deposited.
5. Where building close to or over a public sewer permission may need to be sought from Southern Water. In certain circumstances there is a right to join to a public sewer. There can also be a requirement to connect to a public sewer. Where joining onto existing drainage there may be a need to provide a condition survey and report to prove suitability.
6. Where the proposed work involves the insertion of insulation into the cavity walls of a building, this notice should be accompanied by a statement as to:
 - a) The name and type of insulation to be used.
 - b) Whether or not the insulating material is approved by the British Board of Agreement or conforms to a British Standard.
 - c) Whether or not the installer is a person who is subject of a British Standard s Institute Certificate of Registration or has been approved by the British Board of Agreement for the insertion of that material.
7. Where the proposed work involves the provision of an unvented hot water system, this notice must be accompanied by:
 - a) The name, make, model and type of hot water storage system to be used.
 - b) The name of the body which has approved or certified that the system is capable of performing in a way that satisfied the requirements of Part G, Schedule 1 of the Building Regulations 2002 as amended.
 - c) The name of the body which has issued any current registered operative identity card to the installer or proposed installer of the system.
8. Please keep descriptions brief, for example "single storey rear extension". If carrying out alterations please state what these are.
9. Estimates should be a full market price including labour even if it is DIY. The reason for this is that charges are set relating to our time on each estimated cost and so an artificially low estimate would result in us not recovering our cost. Estimate we consider unreasonably low will result in the application being made invalid.
10. Fees are charged in accordance with a scheme prepared under The Building (Local Authority Charges) Regulations 2010, a copy of which is available on line at www.digitalmaidstone.co.uk or on request. Building Notice charges are payable at the time of submission. If work does not commence the notice will be made invalid after a period of 3 years from the date of submission.
11. The notes are for general guidance only. For more complete information please consult Regulation 13 of the Building Regulations (as amended).
12. The Building Act, The Building Regulations and supporting documents such as the Approved Documents can be downloaded from the Planning Portal: www.planningportal.co.uk
13. Building Regulation and Planning are two different permissions. Permission under the Building Regulations does not mean that the work has planning permission. Not all work requires both Building Regulation and Planning permission.
14. Further information on permission required can be obtained from the planning portal.
